

The autonomous quality control operating system for regulated life sciences.

We help you reduce expensive errors and wasted time operating fragmented, retrospective quality control systems.

ASK

TELL

WATCH

YOUR LAB, IN PLAIN LANGUAGE

“Why was batch-042 reinjected?”

CDS run log

LIMS batch-042

Audit trail user activity

Injection 7 was repeated at 14:02. No reason was recorded in the run log or in LIMS.

✓ Run log

injection 7 / repeated 14:02

✓ LIMS result

batch-042 / assay

Reason for repeat

not documented

FLAGGED

Flagged for a reviewer Recommendation only. It cannot approve, close, release, or sign a record.

TELL

“Start the weekly stability trend review.”

Here are 4 steps. Nothing runs until you approve them.

- Waiting for your approval

WATCH

“Cold room 2 humidity passed its alert limit at 03:40.”

12 stability samples were stored there overnight. I recommend opening a deviation.

- A qualified reviewer decides

PROBLEMS CAUGHT EARLY

EVERY DECISION STAYS YOURS

FAST DEPLOYMENT

EVIDENCE ALWAYS IN HAND

WORKS WITH WHAT YOU ALREADY USE

YOUR DATA STAYS ON YOUR SITE

— THE PROBLEM

You're stuck in manual and fragmented processes.

You retype results between systems that don't talk Every retyped reading or calculation is a chance for a transcription error.	You lose hours to work nobody should do by hand Moving data, rebuilding context, chasing approvals.	You find problems after they've grown Retrospective review catches an error after it has repeated.	You piece together what happened, after the fact Then dig through five systems when someone asks.
---	--	---	--

We take that off your plate.

— HOW WE GET YOU THERE

Four things stand in your way. We clear each one.

PRODUCT 01 Quality Core Evidence gets rebuilt after the fact. One connected record, so the answer is already there.	PRODUCT 02 Integrations Your systems don't talk to each other. We connect them, so your team stops being the glue.	PRODUCT 03 Agentic Automation Someone has to connect it all by hand. Routine QC work runs for you, with your sign-off.	PRODUCT 04 Continuous Quality Monitoring Problems surface late. We watch around the clock and flag early.
---	--	--	---

— YOU STAY IN CHARGE

PixeSci works for you. You make every decision.

PixeSci reads, watches, and recommends. It can't approve, close, release, invalidate, or sign a record, and that limit is built into the software.

— FAST DEPLOYMENT

A PixeSci Node, installed at your site.

We ship you a PixeSci Node, set up before it arrives. Your data and workflows stay on hardware at your own premises.

— SEE IT ON YOUR OWN WORKFLOW

See it on the workflow that worries you most.

Bring one workflow where evidence is hardest to pull together. We'll show you how it looks connected, with your team making every decision.

Our core mission is to create a disease-free world by pushing regulated life science companies into autonomous quality control.

Examples are illustrative. PixeSci helps teams track work and produce records for review; customers still validate and configure the system, train users, maintain SOPs, and meet their own quality requirements. © 2026 PixeSci.
